

# PAKISTAN STUDIES FINAL EXAM GUIDE

Comprehensive Summary: Weeks 1-12

**Condensed Format with Key Concepts, Examples, Dates & Amendments**

## WEEK 1: INDUS VALLEY CIVILIZATION

### Overview

- **Ancient Urban Center:** IVC (3300-1300 BC) was one of world's oldest advanced civilizations in northwestern South Asia; 900+ miles coverage from Himalayas to Arabian Sea.
- **Significance:** UNESCO World Heritage Sites (Harappa, Mohenjo-Daro); source of national pride; established urban planning, standardization, trade networks.
- **Decline Mystery:** Theories include floods, droughts, foreign invasion, epidemic, earthquakes, or socio-political dynamics; transition to Vedic era marked shift from urban to pastoral society.

### Key Innovations

- Standardized weights and measures; fire-baked uniform bricks
- World's first urban sanitation systems with covered drains and private wells
- Wheeled transport (bullock carts); maritime trade with Mesopotamia
- Advanced seals featuring animal designs used for property identification

### Major Cities & Features

- Harappa (Punjab): Fortified citadel, strategic river location
- Mohenjo-Daro (Sindh): Elaborate architecture; rebuilt 7 times; citadel structure

### Timeline

- 3300-1300 BC: Flourishing period
- Early 1900s: Civilization discovered
- 1921-1922: Marshall's excavations revealed complex settlements
- 30% ruins collapsed since 1920s; conservation urgent

## WEEK 2: PAKISTANI SOCIETY & CULTURE

### Culture Definition & Features

- **Nature:** Total way of life including shared values, norms, language, symbols; learned through social interaction, not inherited biologically.
- **Dual Quality:** Cumulative (built on generations) yet dynamic (constantly evolving); shapes reality perception, sets behavioral standards.
- **Components:** Tangible (tools, buildings, clothing) + Intangible (beliefs, values, norms); organized through norms, folkways, mores.

### Linguistic Heritage

- Urdu: National language; blend of Persian, Arabic, Turkish; carries South Asian Muslim literary heritage
- Regional Languages: Punjabi, Sindhi, Pashto, Balochi preserve folk traditions and classical poetry
- Policy Balance: Urdu unifies nation while regional languages maintain cultural diversity

### Traditions & Customs

- Life-cycle Events: Birth, circumcision, marriage, funerals with community participation
- Festivals: Eid-ul-Fitr, Eid-ul-Adha, Basant (spring), Pakistan Day (March 23), Independence Day (Aug 14)
- Dress: Shalwar Kameez (national); reflects Islamic modesty and regional aesthetics
- Arts: Calligraphy (Islamic reverence), Miniature painting (Mughal heritage), pottery, textiles

### Family & Society

- Extended family is core social unit; provides economic support and socialization
- Religion provides moral framework influencing laws, education, social norms
- Urbanization transforming lifestyles but creating inequality challenges
- ~\$33 billion annual remittances from diaspora strengthening transnational ties

## **WEEK 3: EARLY POLITICAL DEVELOPMENT (1947-1958)**

### **Founding Challenges & Structure**

- **Dual Crisis:** Frame constitution while running new state with no administrative base; 7 million refugees, partition violence, Kashmir war.
- **Government Structure:** Constituent Assembly acted as legislature + constitution-maker; Governor-General held emergency powers; bureaucracy independent from elected officials.
- **Early Cabinet:** Jinnah (GG), Liaquat Ali Khan (PM with Foreign Affairs/Defense portfolios); assassination October 16, 1951 created vacuum.

### **Political Instability (1951-1958)**

- Three key dismissals: Nazimuddin (1953) dismissed despite majority support; Bogra appointed by GG, not party
- Objectives Resolution (1949): Liaquat balanced Islamic principles with democracy
- 1952 Language Riots (Feb): Bengali language demands; 21 killed
- 1987 Elections: Massive rigging triggered separatist insurgency

### **Constitutional Transitions**

- 1956 Constitution: Made Pakistan Islamic Republic; attempted federalism but failed to resolve provincial autonomy
- 1962 Constitution: Ayub Khan concentrated power in President; eliminated provincial autonomy
- 1973 Constitution: Restored parliamentary democracy; still in effect with amendments

### **End of Democracy**

- October 7, 1958: Iskander Mirza declared Martial Law citing chaos
- October 27, 1958: Ayub Khan removed Mirza; began 13-year military rule
- Eleven years of democratic experiment ended; military became arbiter of politics

## WEEK 4: STATE THEORIES & GOVERNMENT FORMS

### Four Theories of State Origin

- **Force Theory:** State developed through military conquest; legitimacy from power, not consent (Hitler's Nazi Germany example).
- **Evolutionary Theory:** Family → Clan → Tribe → State through gradual, natural political organization (Native American tribes).
- **Divine Right Theory:** God granted royal bloodlines authority; obedience framed as religious duty; medieval Europe prevalence.
- **Social Contract Theory:** Population consents to government authority in exchange for protection and services; most applicable to Pakistan's 1973 Constitution.

### Key Enlightenment Thinkers

- John Locke: Authority from people's consent; right to revolt if government fails contract
- Jean-Jacques Rousseau: Direct democracy; citizens vote directly; 'general will' guides state
- Adam Smith: Free markets; government hands-off regulation; self-interest increases national wealth
- Montesquieu: Separation of powers into three branches; each checks others' authority

### Parliamentary vs. Presidential Systems

- **Parliamentary:** PM chosen by parliament; fusion of executive-legislature; no direct presidential election
- **Presidential:** President separately elected; strict separation from legislature; independent terms
- **Pakistan Intention:** 1973 Constitution designed parliamentary; but military interventions created de facto presidential system
- **18th Amendment (2010):** Removed presidential dismissal power; restored true parliamentary system

## WEEK 5: DEMOCRACY IN PAKISTAN

### Democracy & Social Democracy

- **Core Definition:** System where decision-making power lies with people directly or through representatives; requires rule of law, political equality, accountability.
- **Social Democracy Essential:** Voting rights insufficient without education, healthcare, economic opportunity; poor cannot participate meaningfully without basic security.
- **Pakistan's Pattern:** Eleven-year democratic period (1947-1958) → military coup → fifteen-year instability → Decade of Democracy (1988-1999) → 1999 coup → 16+ years continuous democracy (2008-2024).

### Key Turning Points

- Sept 14, 1948: Jinnah's death; first leadership vacuum and instability begins
- Oct 16, 1951: Liaquat assassination; Muslim League weakens; military-bureaucracy alliance strengthens
- Oct 7, 1958: First military coup; presidential dismissal power established
- Oct 12, 1999: Second coup ends Decade of Democracy; Musharraf's rule begins
- Aug 9, 2008: Musharraf steps down; longest continuous democracy period begins (16+ years)

### Why Democracy Failed Repeatedly

- **Weak Parties:** Personality-driven, not institution-based; leaders inherited not elected; collapse when leaders removed
- **Military Interference:** Claimed temporary rule but stayed 11-10-9 years each; reset political development
- **Weak Civil Society:** Suppressed unions, fragmented NGOs, media control; limited accountability pressure
- **Judicialization:** Courts validated military coups (Doctrine of Necessity); weakened parliamentary supremacy

### Path Forward

- 18th Amendment (2010): Most important reform; removed presidential dismissal power
- Party Democratization: Leaders must be elected, not inherited; transparent funding needed
- Social Democracy Investment: Education (22.8M children out of school), healthcare, rural development
- Continued 2008-2024 democracy shows institutional progress; must consolidate against coups

## **WEEK 6: NEOLIBERALISM & ECONOMIC DEPENDENCY**

### **Neoliberal Model & Pakistan's Adoption**

- **Global Enforcement:** 30+ years; promoted free markets, privatization, deregulation; created inequality, job insecurity, social fragmentation in developing nations.
- **Pakistan's Path:** IMF/World Bank pressure forced privatization of public assets, subsidy cuts, austerity; hurt working class/poor; enriched elites; weakened welfare.
- **Alternative Model:** Keynesian Welfare emphasizes state-led planning, full employment, public goods investment (education, health, infrastructure), progressive taxation.

### **IFI Control Mechanisms**

- IMF, World Bank, WTO enforce conditions; developing countries lose policy autonomy to foreign institutions
- Structural adjustment programs cut public spending, remove trade barriers, cause job insecurity, lower wages
- Pakistan's 1990s-2000s privatization transferred profitable utilities to private companies; prices doubled for citizens

### **Resistance & New Paradigms**

- Global protests (Seattle, Genoa, Davos) symbolized public rejection of neoliberal domination
- Pakistan's Lawyers' Movement (2007): Connected judicial independence with resistance to neoliberal injustice
- Recognition: Western capitalism undermines national sovereignty; elite-alignment prioritizes foreign approval over local welfare

### **Security-Finance Nexus**

- War on Terror (post-2001): Massive conditional aid; prioritized security, not welfare; strengthened elites
- Militarization of governance: Private security firms rise; citizens purchase protection; state failure evident
- CPEC Challenge: Infrastructure development while resisting neoliberal dependency requires careful balance; debt sustainability critical

## WEEK 7: PAKISTAN'S ECONOMIC GROWTH

### Growth Patterns & Volatility

- **1960s Peak:** 6.8% annual growth through state-led planning under authoritarianism; outpaced India but weakened democratic institutions.
- **1990s Liberalization:** Attempted but vulnerable to shocks; failed to protect economy from crises.
- **2000s Rebound:** Growth 1.8%→7%, exports doubled, tax revenue tripled; external debt halved (52%→26% GDP); but unsustainable due to debt-dependent growth.
- 2010 Floods: \$43B damage; disrupted progress
- 2020 COVID-19: GDP contraction; 2021 FDI declined from \$2.56B to \$2.06B

### Internal Barriers

- SMEs: 30% GDP, 25% exports but face finance limits, complex regulations, poor infrastructure
- Labor Rigidity: Rigid laws, high hiring/firing costs, skill mismatches; unemployment 6.42% (2022)
- Tax Evasion: 50% of tax base uncollected; deprives government revenue for public services
- Regional Inequality: Urban-rural gap severe; Balochistan/KPK severely underdeveloped
- Bureaucracy & Corruption: Slow business processes, discourage investment

### External Barriers

- Political Instability: Three military coups disrupted continuity; unlike India's stable democracy
- Terrorism: FDI dropped from \$8B (2007) to \$3.5B (2022) due to security concerns
- Infrastructure Deficit: Energy shortages, outdated transport limit productivity
- Weak Governance: Corruption hinders policy implementation

### Circular Economy Solution

- Definition: Reduce waste, reuse materials, recycle—lower resource extraction reliance
- Global Success: Europe reduced extraction 12%, emissions 9% (2010-2018)
- For Pakistan: Recycled aluminum uses 95% less energy; creates jobs; reduces imports; builds resilience
- Target: 30% waste reduction, renewable 30% by 2030, 500K+ jobs by 2035

## WEEK 8: SYNTHESIS & FUTURE PATHWAYS

### Root Causes of Economic Underperformance

- **Convergence Crisis:** Simultaneous internal barriers (weak SMEs, rigid labor, tax evasion, inequality) AND external pressures (instability, terrorism, weak governance).
- **Historical Pattern:** Authoritarian growth (1960s 6.8%) weakened institutions; democratic periods faced military obstruction; cyclical instability without sustainable development.
- **Neoliberal Trap:** IMF/World Bank conditions → privatization/austerity → public services collapse → poverty increases → instability → more loans; vicious cycle.

### Comprehensive Recommendations

- Governance: Anti-corruption institutions, rule of law, professional civil service
- SME Support: Finance access, regulatory simplification, international market access
- Labor Reform: Flexible laws with social protection; skills training
- Infrastructure: Renewable energy, transport, digital systems; public investment
- Debt Reduction: Domestic resource mobilization; reduce IMF dependency

### Breaking Neoliberal Dependency

- Reject IMF/World Bank austerity; rebuild public institutions focused on education/healthcare
- Explore regional cooperation (SAARC, Belt and Road) with critical assessment
- Build independent institutions resisting external dominance

### Vision 2035

- 5%+ sustained growth; poverty <15%; education enrollment >90%
- Renewable energy 30%; external debt <25% GDP
- FDI \$5B+ annually; regional cooperation expanding
- Democracy consolidated with 20+ continuous years; military subordinated to civilian rule

## WEEK 9: STRATEGIC SIGNIFICANCE & FOREIGN POLICY

### Geo-Strategic Location & Challenges

- **Gateway Position:** Northwest South Asia connecting Middle East/Central Asia; transit economy potential undermined by security challenges and great power politics.
- **Multiple Crises:** India's increasing hostility, terrorism, internal instability (illiteracy, ethnic diversity, population growth), spillover from Afghan wars (70,000+ lives, economic loss).
- **Shifting Role:** USSR containment (1980s) → GWOT cooperation (2001-2021) → post-US withdrawal uncertainty (2021+); each phase created costs requiring pragmatic policy.

### Key Security Issues

- War on Terrorism: TTP emergence (2007) after US-Taliban conflict; Pakistan paid heavy cost for frontline role
- Afghan Wars Spillover: Opium trafficking, corruption, instability; Pakistan seeks peace for trade and security
- Post-US Withdrawal (Aug 2021): Taliban control Afghanistan; civil war risk persists; stability in KPK/FATA/Balochistan linked to Afghan peace
- Eastern Border: Article 370 revocation (Aug 5, 2019) intensified Kashmir crisis; Balakot airstrikes (2019); nuclear tensions

### Foreign Policy Foundations

- National Interests: Security vs. India, economic survival, Islamic solidarity in international forums
- Jinnah's Vision: Goodwill, honesty, peace, UN principles—undermined by India's hostility and wars (1948, 1965, 1971)
- Objectives & Determinants: National security (primary), financial factors, ideology, historical-psychological factors
- Principles: Islamic world unity, good neighbor relations, peace, self-determination support, UN cooperation, independent policy

### Future Requirements

- Peace in Afghanistan → economic opportunities, trade, CPEC success critical
- Kashmir resolution needed; no military solution; political dialogue required
- Balanced China-US relations; resist geopolitical pressure; economic focus; political stability

## WEEK 10: THE KASHMIR ISSUE

### Conflict Origins & Partition

- **1947 Accession:** Maharaja signed accession to India (Oct 26, 1947) despite 77.11% Muslim majority; tribal intervention (Oct 22) from Pakistan side; immediate war; UN ceasefire (Jan 1, 1949).
- **UN Promise Betrayed:** PM Nehru pledged plebiscite to determine future; promise never fulfilled; India consolidated occupation; established dangerous precedent.
- **Sheikh Abdullah's Role:** Rigged 1951 elections supporting accession; later sought independence; imprisoned; showed elite duplicity on democracy.

### Article 370 & Autonomy

- 1954 Article 370: Ratified Kashmir's autonomous status; limited India's legislative power (defense, foreign affairs, communications only)
- Failed to resolve grievances; constitutional protections insufficient against political repression

### Insurgency Triggers

- 1987 Elections Rigging: Massive rigging triggered separatist insurgency; turning point toward militarization
- JKLF Formation (1988): Mass protests demanding 'Azadi' (independence); fresh resistance wave; severe repression follows
- Burhan Wani Killing (July 8, 2016): Triggered massive uprisings, renewed violence; became youth resistance symbol

### August 5, 2019 Crisis & Aftermath

- Article 370 Revocation: India unilaterally repealed special status; removed Article 35A; bifurcated state into two Union Territories
- Lockdown & Blackout: Prolonged curfew; total communications blackout; one of world's longest internet shutdowns
- Human Rights Crisis: Pellet guns blinding thousands, torture, fake encounters, extra-judicial killings documented
- Women's Violence: Rape used as 'cultural weapon of war'; 882 gang rapes reported (1992 alone); 'half-widows' (status unknown); PTSD epidemic
- International Attention: China raised issue at UNSC (Dec 2019) first time in 50 years; India refuses third-party intervention

### Path Forward

- UN intervention needed; impartial plebiscite as promised; end militarization; restore democratic governance
- Human rights accountability; security force impunity must end; Kashmiri self-determination respected

## WEEK 11A: CLIMATE CHANGE & ENVIRONMENTAL DEGRADATION

### Crisis Overview

- **Temperature Rise:** 11 of 12 warmest years (1995-2006); 1.1-6.4°C rise estimated by 2100; catastrophic ecosystem impacts.
- **Disaster Scale:** 3,852 natural catastrophes; 780,000+ deaths; 2 billion affected; economic losses exceed \$960B; predicted to double in 10-15 years.
- **Causes:** CO<sub>2</sub> accumulation increased 70% (half since 1970); fossil fuel combustion, deforestation, urbanization, industrialization drive change.

### Climate as Security Threat

- Migration: 25M climate refugees (2001); predicted 50M by 2050; driven by droughts, storms, sea-level rise
- Water Conflicts: 1.1B lack safe water; 3.5M deaths annually; 300 potential conflicts globally; herder-farmer violence (Nigeria) kills ~2,000/year
- Food Insecurity: If warming rises 3°C, hunger victims rise 250M→550M; crop production drops 10-30% by 2050

### Vulnerable Nations

- Bangladesh: 77M exposed to arsenic from flood-contaminated water; 2-3 ft sea-level rise could displace 30M people
- Sudan (Darfur): War partly caused by drought/land deterioration; migration from North triggered conflict
- Pakistan: Ranked among most vulnerable; water scarcity, floods (2010 \$43B damage), agricultural stress

### Action Requirements

- Countries must define individual/collective roles; international accountability mechanisms
- Trading restrictions/sanctions on nations failing climate action
- National agencies penalize environmental guideline violations
- Developing nations need \$50B for climate adaptation; capacity severely limited

## WEEK 11B: SUSTAINABLE DEVELOPMENT GOALS

### SDG Framework & Pakistan's Ranking

- **Universal Agenda 2030:** 17 interconnected goals for equitable, sustainable development; 'no one left behind' principle; systemic changes across economic, social, environmental.
- **Pakistan's Performance:** Ranked 129th of 165 countries (Bangladesh 120, India 116); progress mixed—poverty reduced, health improved, education stagnant, inequality high.
- **Institutional Framework:** First country to formally approve SDGs as national agenda (Feb 16, 2016); PM office allocated ~Rs 55B; Parliament unit Rs 30B annual budget.

### Priority Categories

- Category 1 (Immediate): Goals 2-4, 6-8 (hunger, health, education, water, energy, work); highest urgency given Pakistan's conditions
- Category 2: Goals 1, 5, 9-11, 17 (poverty, gender, industry, cities, partnerships)
- Category 3: Goals 12-15 (consumption, water/land life, climate); longer-term focus

### Progress Summary

- Poverty (SDG 1): 9.3M lifted (2014-2019); steady but insufficient
- Health (SDG 3): Maternal mortality ↓32.6% (2007-2019); skilled birth attendance ↑10%
- Education (SDG 4): Dismal—completion 67%, literacy 60%; 22.8M children out of school
- Water (SDG 6): 94% access; Baluchistan ↑17%
- Energy (SDG 7): Clean fuel 47%; renewable expansion inadequate
- Climate (SDG 13): GHG emissions ↑2.6% annually; insufficient progress

### Implementation Challenges

- Economic: Instability, inflation, unemployment, fiscal deficits, funding shortage
- Political: Instability, weak institutions, bureaucratic inefficiency, corruption
- CPEC Contribution: Infrastructure (SDG 9), energy (SDG 7), jobs (SDG 8), poverty reduction (SDGs 1&10)
- Recommendations: Governance reform, diversify funding (PPP), integrate SDGs into plans, rule of law, federal-provincial coordination, empower local governments

## WEEK 11C: HYBRID WARFARE

### Definition & Evolution

- **Core Concept:** Simultaneous use of conventional weapons, irregular tactics, terrorism, criminal activities, non-military means (political, economic, information, diplomatic).
- **Blurred Boundaries:** No universal definition; blurs lines between war and peace; convergence of civilian/combatant, physical/psychological, violence/nation-building.
- **Historical Roots:** Ancient (Sun Tzu: 'subdue enemy without fighting'); Cold War (US Containment, USSR Comintern); post-9/11 global non-state actors (Al-Qaeda, ISIS) complexity.

### Physical & Conceptual Modes

- **Physical:** Conventional warfare, asymmetric warfare, terrorism, criminal activities (smuggling, narco-terrorism)
- **Conceptual:** Political (separatists, insurgents), economic (sanctions, resource exploitation), information (propaganda, cyber, media), diplomatic (isolation)

### Case Studies

- **Russia-Ukraine (2014):** Covert militias ('little green men'), cyber warfare, information operations; secured Crimea without declared war
- **Iran-Middle East:** Supports proxies (Houthis Yemen, Assad Syria, Hezbollah); challenges Saudi/US dominance through regional proxy warfare

### Pakistan's Specific Threats

- **Ethnic Fragmentation:** Enemies revive 1971 history to fracture Pakistan; support Baloch separatism, PTM Pashtun movements
- **Sectarianism:** Exploit Sunni-Shia divide (Iran-Saudi rivalry influence); create internal disorder
- **Ideological Polarization:** Media warfare creating 'Liberal' vs 'Conservative' clash; deepen social divisions
- **Anti-CPEC Campaign:** Spread 'neo-colonialism' myths, create Balochistan insecurity to scare investors, anger provinces by framing Punjab as sole beneficiary

### Counter-Strategies

- **Promote True Federalism:** Equal resource-sharing among provinces; protect minorities; decentralization
- **'Whole-of-Nation' Approach:** Government, civil society, media, business, administration united response
- **Regional Diplomacy:** Coordinate with Iran, Afghanistan, China, Russia on HW threats; intelligence sharing
- **International Advocacy:** Use UN platforms to expose hostile activities (Kulbhushan Jadhav case—Indian spy)

## WEEK 12: WELFARE STATE & DEMOCRACY

### Core Principles

- **Definition:** Democratic state guaranteeing basic rights/freedoms (rule of law) while taking legal, financial, material measures to equalize social differences.
- **Three Pillars:** Freedom, Equality (Justice), Solidarity; German Basic Law Article 20 declares equal validity of Democracy, Welfare State, Rule of Law.
- **Interdependence:** 'Genuine democracy impossible without social policy'; formal freedom worthless without material basics (food, shelter, education).

### Material Prerequisites for Democracy

- **Basic Necessities:** Self-esteem and self-determination require basic material provision; formal freedom 'worth little' without essentials
- **Research Evidence:** Unemployed, uneducated, poor participate less in politics; social security required for equal participation
- **Historical Context:** 1868 German Workers declared political freedom 'indispensable condition of economic liberation'

### Negative vs. Positive Rights

- **Libertarian (Negative):** 'Freedom FROM' interference; government as referee; taxation for welfare viewed as coercive violation of property rights
- **Social Democratic (Positive):** 'Freedom TO' act and participate; substantive freedoms (health, education, security) enable real liberty; taxation necessary to empower citizens
- **Rebuttal to Critics:** (1) Cost—richest democracies have largest welfare states; (2) Debt—no evidence welfare causes high debt; (3) Redistribution—property rights depend on decent living for all

### Social Democratic Model

- **Historical Achievement:** Welfare state liberated millions from social constraints; major 20th-century civilization achievement
- **Preventive Approach:** Create conditions for self-determined life, not just fix problems after; Scandinavian model demonstrates sustainability
- **Pakistan Context:** Social welfare (education 60%, literacy low, poverty 25%) inadequate; democracy undermined by inequality and insecurity

### Vision for Pakistan

- **Democracy + Welfare State:** Genuine democracy requires simultaneous political equality AND economic security
- **Investment Priorities:** Education (22.8M out of school), healthcare, infrastructure, economic opportunity
- **'General Will' Achievement:** Unite citizens around common good (justice, equality) rather than narrow interests; create fairer society
